

TYLER PRUYN

Product Design Leader • Player-Coach • AI-Native Product Design

Owasco, NY • tpruyn@gmail.com • tabanyc.com • linkedin.com/in/tpruyn

Product design leader with 9+ years across proptech, fintech, healthcare, and B2B SaaS. First design hire more than once, building and managing design functions from zero while staying hands-on. Currently product managing and designing AI-powered workflow and contract-automation tooling at Northwell Health.

EXPERIENCE

Product Design and AI Consultant • Northwell Health *(Sept 2025 - Present)*

- First UX hire for a Contract Lifecycle Management platform serving a procurement team responsible for **\$6 billion in annual spend**. Ran department-wide research that set roadmap priorities around the team's most critical needs, alongside UX design and platform customization.
- Designed and configured **7 AI tools** inside the organization's internal AI Hub, including legal contract summarization and data-extraction, plus a knowledge base and task-based assistant that answers Agiloft how-to questions, reducing support tickets by an estimated **15% in the first month**.
- Customized and configured AI contract-analysis, designed prompt frameworks and validation checks that flag negotiation risks, trained the model to **95% accuracy across a 750-contract dataset** for rollout.
- Redesigned contract review outputs into scannable, action-oriented, risk-flagged formats, replacing line by line review so legal can assess risk, set negotiation strategy, and move faster.

Lead Product Designer → Head of Design • Darwin Homes *(Sept 2022 - Apr 2025)*

- Designed the multi-tenancy and role-based client-visibility layer (permissions and portfolio views) that enabled the company's pivot from small operators to institutional clients with nationwide portfolios, letting clients securely access their own data and supporting onboarding of major institutional accounts on a platform, driving **3x ARR growth and scaling toward 15,000+ homes under management**.
- As Head of Design, managed and mentored a lean design team of 2 designers and led design across **four cross-functional product squads** through a platform pivot.
- Designed an in-house AI chat assistant to replace a third-party resident-communications tool that answered lease, payment, maintenance, or escalated urgent issues, eliminating **\$150,000 per year in vendor cost**. Designed additional AI and automation that led Ops to hold performance after a 30% reduction in team size.
- Consolidated a fragmented UI stack (Ant-D, Tailwind, and Bricks) onto a single system, auditing patterns for quality and fit and migrating pages to the current standard to reduce inconsistency across the platform.

Product Design Director • ButterflyMX *(Jun 2020 - Aug 2022)*

- First design hire at a Series B proptech IoT company. Built the design function from the ground up, grew the team from **0 to 3 designers**, and established a working process across design, product, and engineering.
- Led end-to-end design across iOS, Android, web, and hardware: the resident mobile app (rated **4.8 on the App Store across 99K+ ratings**), video intercom UI redesign, a permissions and access management overhaul, and **four shipped physical products** spanning keypad, key locker, package room, and new intercom.
- Integrated user research and usability testing into product development. Launched a unified design system and new brand identity across product and marketing that has proved its durability in the last 4 years.

Product Designer • Button *(May 2019 - May 2020)*

- Owned end-to-end design of optimization tools for mobile commerce and affiliate marketing, driving a **20% lift in affiliate brand-partner conversion**.
- Founded the company's first internal research practice to establish a measurement culture.

UX Designer • Bloomberg LP *(Aug 2018 - May 2019)*

- Redesigned a B2B financial compliance (KYC) application for institutional banking and hedge fund clients, leading interviews, workflow mapping, prototypes, and moderated usability testing with enterprise clients.

UX Designer • Web.com / Yodle *(Jul 2017 - Aug 2018)*

- Designed core experiences for SMB to enterprise marketing platforms, leading a responsive dashboard redesign focused on data visualization and documenting components for a company-wide design system.

UX Architect • The Economist *(Aug 2016 - May 2017)*

- Led UX across mobile, tablet, and web, and designed the first voice interface and interaction flow for The Economist's Amazon Alexa integration.

SKILLS

Design Systems, UX Research, Usability Testing, 0-1 Design, Platform & Marketplace UX, Information Architecture, Interaction Design, Branding, B2B SaaS, B2C, WCAG, Design Strategy, Roadmap Prioritization, Workshop Facilitation, AI Workflow Design, AI-Assisted Prototyping

TOOLS

Figma, Adobe CC, Miro, Notion, Amplitude, Pendo, Fullstory, Lyssna, UserZoom, Linear, Atlassian Suite, Microsoft Office, Cursor, Claude, GitHub, Terminal

MENTORSHIP

Designlab *(Aug 2023 - Present)*

Mentoring early-career designers on portfolio, execution, and career strategy through structured sessions.

ADPList *(Jan 2022 - Present)*

90+ sessions on portfolio, career transitions, and design leadership; ranked **top 10% of contributors**.

EDUCATION

School of Visual Arts • BFA, Design

General Assembly • UX Design Immersive (Certificate)

CraftAmplify • AI Frontend Coding for Designers (Certificate)
